

## State Fire Prevention Fee

The California Legislature enacted Assembly Bill X1 29 in July 2011, approving a new annual Fire Prevention Fee to pay for fire prevention services within the State Responsibility Area. An estimated 800,000 California homeowners will be assessed up to \$150 for each habitable structure to fund firefighting efforts in response to increased wildfire risk. For more information about the State Responsibility Area Fire Prevention Benefit Fee, visit the California Fire Prevention Fee website at:
